

Modern Style

1960-Present

The 1960s were a period of great change, with conventions being challenged and redefined, particularly through a growing youth culture. In Australia, the birth of our multicultural society was also beginning, with many European immigrants bringing new cultures, ideas, food and fashions.

By the 1960s the typical Australian home was a single-storey house built of brick, brick-veneer, weatherboard or fibro-cement.

Elsewhere in the Australian building industry were growth, expansion and development. Sky-scrapers grew taller and urban sprawl continued to change our cities.

Architects were using new materials and technologies in new ways - from the solid, stark style of 'brutalism' through to the 'structural' style of sporting and entertainment centres.

While these new building styles were also used for homes, many people started looking back to older styles as inspiration for their houses.

HOW TO ORDER YOUR MOULDING

Ordering your moulding is simple. We just need the answers to a few questions:

1. Are you painting or staining your moulding?
This will determine which timber you choose. If you are painting, choose Pine or MDF.
2. Choose the appropriate timber species
3. Choose your moulding number
4. Work out the quantity required.

If you wish to match an existing moulding, we require:

1. A sample or "to scale" drawing
2. Timber species required
3. Quantity required

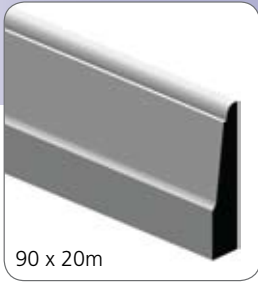

Please call our friendly staff on 03 9808 5522 to help you with these questions.
